## RHINESTONE PHONE CASES

**e** EASY

### WHAT YOU'LL NEED

- Selection of Flat back Rhinestones (assorted colours and shapes)
- E6000 Glue (certain glues may affect the finish of the rhinestone)
- Phone Case

**Step 1** – Using your choice of rhinestones lay out a pattern on the back of the phone case. You can either create an all over pattern or create a design.

**Step 2** – Start gluing rhinestones one by one into place on the phone case

**Handy Tip** – Take a photo before gluing so you have a reference of your pattern/design.

**Step 3** – Allow glue to dry and place phone in case for use.
