### INSTRUCTIONS

#### Step 1

Choose a colour of yarn for the warp (this is the thread that gets strung over the ring and holds the tension while you weave).

#### Step 2

Take the thread around the edge of the ring, leaving a tail of about 5cm.

#### Step 3

Pull the thread straight down over the bottom of the opposite edge of the ring, taking it over the edge and to the back.

#### Step 4

Take the thread up and over the downward thread. Bring the thread over the front of the ring, moving it about 3cm from where you first started.

#### Step 5

Continue taking the thread over the edge and over the other side, just like a figure of 8.

Ensure to keep the threads in the centre crossing over, until you get to the other side of the ring.

#### Step 6

Once you reach the last strand, take it around the centre a few times to secure the warp. Take the last strand up to meet with the first thread and tie it to the tail you had made at the beginning.

#### Step 7

Using a length of yarn onto your needle, begin threading over and under the warp strands. Continue weaving over and under.

#### Step 8

Once you are finished with a colour, thread the yarn back down through the previous layers and cut the excess thread off.

#### Step 9

To add some texture, you can double up on yarn. To create some tassels at the bottom, cut around a dozen equal pieces of yarn and create a lark's head knot.
