SOLAR SYSTEM COSTUME

e EASY

WHAT YOU'LL NEED

- Solar System Decofoam Kit
- Decofoam Cone 100mm 3pk
- Decofoam Cone 200mm 2pk
- AMSCAN Tutu Black (to fit Adult or Kids)
- Ribtex Headband
- Felt Sheets A4 in Orange (x3) and Yellow (x2)
- Hot Glue Gun and Sticks
- Black Thread and Needle (Preferably Curved)
- Knife
- Assorted Paints and Brushes

INSTRUCTIONS

Step 1 - Paint the Decofoam pieces in the kit as desired and leave to dry. Construct Saturn as per the kit's instructions

Step 2 - Using needle and thread sew the planets onto your tutu.

Step 3 - Take a 100mm cone and wrap one layer of orange felt around it so that it is fully covered. Trim to leave a 1-2 cm overlap where the edges of the felt meet, and a 2-3cm overhang around the base of the cone.

Step 4 - Using your hot glue gun, secure the felt along the overlap line first, then tuck the overhang around the edge of the base and glue in place.

Step 5 - Repeat steps 4 & 5 to cover the remaining two 100mm cones.

Step 6 - This step must be completed by an adult. Take your 200mm cones and trim their bases with your craft knife so they stand approximately 120-150mm high.

Step 7 - Cover the trimmed cones in yellow felt in the same way you covered the orange cones in steps 4 & 5.

Step 8 - Glue the cones to the headband as pictured. Add a few stitches with your needle and thread for extra security if required.
